

INVITATION TO TENDER

Offshore Well Testing Services Package

Reference: ITB-2026-DEMO-001 | Issued by: Meridian Energy Company | Issue date: 1 April 2026

Meridian Energy Company (the "Company") invites suitably qualified contractors to submit a tender for the provision of offshore well testing services for the North Field development. This document, together with its appendices, sets out the scope of work, the qualification requirements, and the basis on which tenders will be evaluated. This is a fictional document prepared to demonstrate tender compliance software.

1. INSTRUCTIONS TO BIDDERS

1.1 Submission Deadline

Tenders shall be submitted electronically through the Company's procurement portal no later than 14:00 hours local time on 30 April 2026. Tenders received after the stated deadline will be rejected without evaluation.

1.2 Tender Validity

Each tender shall remain valid and open for acceptance for a period of not less than one hundred and twenty (120) days from the submission deadline. A tender offering a shorter validity period shall be treated as non-responsive.

1.3 Submission Format

The Bidder shall submit its tender in three separately sealed electronic envelopes: Envelope 1 - Qualification and mandatory forms; Envelope 2 - Technical proposal; Envelope 3 - Commercial proposal. Pricing information shall not appear in Envelopes 1 or 2.

1.4 Clarifications

Requests for clarification shall be submitted in writing no later than fourteen (14) days before the submission deadline. The Company will issue responses to all Bidders without identifying the requesting party.

1.5 Bid Bond

The Bidder shall provide a bid bond in the amount of USD 250,000, issued by a bank acceptable to the Company and valid for thirty (30) days beyond the tender validity period.

2. SCOPE OF WORK

2.1 Overview

The Contractor shall provide personnel, equipment, and consumables for surface well testing operations on up to six (6) exploration and appraisal wells in the North Field, including flow testing, data acquisition, and well clean-up operations.

2.2 Equipment Provision

The Contractor shall provide a complete surface well test package including a test separator, surge tank, choke manifold, data header, and associated piping, rated for a working pressure of not less than 10,000 psi.

2.3 Personnel

The Contractor shall provide a minimum of two (2) well test supervisors and four (4) well test operators per crew, each holding valid offshore survival and medical certification.

2.4 Mobilisation

The Contractor shall achieve full mobilisation of equipment and personnel to the Company's designated offshore location within twenty-one (21) days of receipt of the Company's written call-off notice.

3. QUALIFICATION REQUIREMENTS

3.1 Offshore Well Testing Experience

The Bidder shall have completed a minimum of three (3) offshore well testing projects within the last five (5) years, each involving flow testing of at least one well. The Bidder shall list each qualifying project stating the client name, the number of wells tested, and the completion date.

3.2 Financial Standing

The Bidder shall demonstrate an average annual turnover of not less than USD 20 million over the last three (3) audited financial years and shall submit audited financial statements for each of those years.

3.3 Quality and Environmental Certification

The Bidder shall hold current certification to ISO 9001 (Quality Management), ISO 14001 (Environmental Management), and ISO 45001 (Occupational Health and Safety Management). Copies of all three certificates shall be included in Envelope 1.

3.4 In-Country Value

The Bidder shall state the percentage of contract value to be spent in-country and shall commit to a minimum in-country value of forty percent (40%) of the total contract price.

4. HEALTH, SAFETY AND ENVIRONMENT

4.1 HSE Management System

The Bidder shall operate a documented HSE management system and shall submit the system manual, or a detailed summary of its contents, with its tender.

4.2 Safety Performance

The Bidder shall report its Total Recordable Incident Rate (TRIR) for each of the last three (3) calendar years. A Bidder whose three-year average TRIR exceeds 0.50 per 200,000 man-hours shall not be considered for award.

4.3 Incident Reporting

The Contractor shall report any recordable incident to the Company's HSE representative within four (4) hours of occurrence and shall submit a written investigation report within seventy-two (72) hours.

4.4 Emergency Response

The Contractor shall maintain an emergency response plan covering well control incidents, hydrocarbon release, and medical evacuation, and shall participate in the Company's offshore emergency drills.

5. TECHNICAL REQUIREMENTS

5.1 Equipment Certification

All pressure-containing equipment shall hold valid third-party certification issued within the preceding twelve (12) months, and certificates shall be available for inspection prior to mobilisation.

5.2 Separator Capacity

The test separator shall have a minimum liquid handling capacity of 10,000 barrels per day and a minimum gas handling capacity of 50 million standard cubic feet per day.

5.3 Data Acquisition

The Contractor shall provide real-time data acquisition with a sampling interval of not more than ten (10) seconds, and shall deliver the complete test dataset to the Company within twenty-four (24) hours of the end of each test.

6. COMMERCIAL REQUIREMENTS

6.1 Pricing Basis

Pricing shall be submitted on a day-rate basis using the Company's pricing schedule (Form B) without alteration to its structure. Lump sum or alternative pricing structures will not be evaluated.

6.2 Payment Terms

The Company shall pay undisputed invoices within forty-five (45) days of receipt of a valid invoice supported by Company-approved field tickets. Bidders shall confirm acceptance of these payment terms without qualification.

6.3 Currency and Price Validity

All prices shall be quoted in United States Dollars (USD) and shall remain firm and fixed for the first twenty-four (24) months of the contract term.

7. INSURANCE AND LIABILITY

7.1 Insurance Requirements

The Contractor shall maintain employer's liability insurance and third-party liability insurance, each with a limit of not less than USD 10,000,000 per occurrence, for the duration of the contract.

7.2 Liability Position

Bidders shall confirm acceptance of the Company's standard liability regime as set out in the draft contract, under which each party indemnifies the other for injury to its own personnel and damage to its own property.

8. MANDATORY SUBMISSION FORMS

8.1 Form A - Bid Submission Letter

The Bidder shall submit Form A, signed by a duly authorised representative, confirming the tender price, the validity period, and acceptance of the tender conditions.

8.2 Form B - Pricing Schedule

The Bidder shall submit Form B, completing every line item of the pricing schedule. Incomplete pricing schedules will be treated as non-responsive.

8.3 Form C - HSE Statistics Return

The Bidder shall submit Form C, stating lost time injuries, recordable incidents, and man-hours worked for each of the last three (3) calendar years. Form C is a mandatory submission and a tender submitted without it will be rejected.

8.4 Form D - Conflict of Interest Declaration

The Bidder shall submit Form D declaring any actual or potential conflict of interest involving Company personnel or affiliates.

8.5 Form E - In-Country Value Commitment

The Bidder shall submit Form E stating its committed in-country value percentage and the basis of its calculation.

9. EVALUATION

9.1 Evaluation Criteria

Responsive tenders will be evaluated on a weighted basis of seventy percent (70%) commercial and thirty percent (30%) technical, applied only to tenders that pass the qualification and HSE screening in Sections 3 and 4.

9.2 Grounds for Disqualification

The Company may disqualify a tender that omits a mandatory form, contains pricing in the technical envelope, or qualifies the Company's payment or liability terms.
